

Textile Technologies

Workshops

Educational Path

During our Textile - Technology Workshops, attendees will acquire production techniques and basic notions regarding the production process and the main features of natural and chemical fibers, in order to properly distinguish, label and place the main types of yarns and fabrics in a working environment.

Two separate sessions are scheduled: the first session is about introducing and getting to know textile fibers, the second one is about realizing spun yarns, producing fabrics, and getting to know the main textile finishing processes.
