

CAD Patternmaker

Specialized Course – Lectra Operating System

Aim of the Course

The Course aims at improving Patternmakers' skills, providing them with an appropriate grounding which allow them to know the functions and dynamics of the most popular CAD software in Fashion Business, in order to realize the phases of construction and elaboration of a Fashion collection, in the best and fastest way.

Educational Path

The Course will provide attendees with technical/practical knowledge regarding dynamics and functions of Modaris e Diamino Lectra operating system. At the end of the Course, attendees will be able to scan and create models, edit and transform them, grade up and down sizes and much more, on screen.

Students will be able to use the most updated versions of this software thanks to a partnership between the school and LECTRA.

Enrollment eligibility

Good knowledge in industrial patternmaking and fairly good computer skills.
